You should write at least **150** words.

Monthly Temperature and Precipitation

WRITING TASK 2

You should spend about **40** minutes on this task.

Write about the following topic.

It is now possible for scientists and tourists to travel to remote natural environment, such as the South Pole.

What are advantages and disadvantages of this development?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

You should write at least **250** words.

SAMPLE WRITING TASK 1

Sample Band: 8.0

The chart illustrates average temperature and rainfall changes during the year in the city of Kolkata. The most noticeable trend is that the highest temperature during the whole period was in May whereas in July the greatest amount of precipitation can be found. At the same time, the lowest temperature observed in January and December and the lowest precipitation amount was in December. THIS IS FANTASTIC AND SHOWS A GOOD APPRECIATION OF THE INTRODUCTION.

Looking at the precipitation graph, the amount climbed from January to July and then slipped back until the end of the year. NEED DATA. MUST USE NUMBERS. The biggest change was in October when the rainfall plummeted more than three times compared with September. The temperature during the whole year didn't change drastically, and the lowest one was 20 degrees in December while the highest observed in May and was almost 30 degrees. In the beginning of the year, the temperature was surging modestly until the maximum in May and when started dropping until December.

SAMPLE WRITING TASK 2

Sample Band: 8.0

Nowadays, there are more and more abilities to travel not only for scientists but also for tourists. Different travel companies offer new journeys to some places with A faraway natural environment. This essay will examine the advantages and disadvantages of such experience with some examples from real life.

The two main advantages of these trips are the ability to see the UNUSUAL nature itself and to back off from daily business and take some rest. Firstly, these days it is very hard to find some places with untouched nature. Trips to locations like THE South Pole give a feeling of uniqueness and unforgettable landscapes. Secondly, such journeys allow US to put off all stuff and be with a nature one on one. People there can set aside all gadgets and just enjoy the nature itself.

However, such tourism also has some major disadvantages. To start with, such travel is very expensive. From my own experience, most of these trips are only available in travel companies which usually offer packs of one or two weeks which inevitably leads to high costs. Moreover, these places are located very far from the majority of localities, and, as a consequence, the prices for transport are also very high. Secondly, new possibilities to travel increase the number of tourists. As a result, such places lose their uniqueness and, at some point, become usual with a large stream of tourists daily.

To conclude, although this development opens new abilities to travel, it has a negative effect to the environment, and our planet loses unaffected areas. I believe that this journey expansion will not do much damage to our nature.
