

IELTS Practice Tests Plus Volume 3 Listening Practice Test 7

HOW TO USE

You have 2 ways to access the listening audio

1. Open this URL <http://link.intergreat.com/5LCfN> on your computer
2. Use your mobile device to scan the QR code attached

Questions 1-10

Complete the notes below.

Write **NO MORE THAN TWO WORDS OR A NUMBER** for each answer.

Notes for holiday

Travel information

Example

Will email the **flight number**

- must find out which 1 _____ arriving at
- best taxi company 2 _____
- Note: Simon lives in the 3 _____ of the city
- Simon's cell phone number: 4 _____

What to pack

(to wear)

- casual clothes
- one smart dress - to wear at a 5 _____
- a good 6 _____
- tough 7 _____

(to read)

- try to find book named 8 _____ by Rex Campbell.

(for presents)

- for Janice: 9 _____
- for Alec: 10 _____ (with racing pictures)

Questions 11-16

Choose the correct answer, **A**, **B** or **C**.

Camber's Theme Park

11 According to the speaker, in what way is Camber's different from other theme parks?

- A** It's suitable for different age groups.
- B** It offers lots to do in wet weather.
- C** It has a focus on education.

12 The Park first opened in

- A** 1980.
- B** 1997
- C** 2004.

13 What's included in the entrance fee?

- A** most rides and parking
- B** all rides and some exhibits
- C** parking and all rides

14 Becoming a member of the Adventurers Club means

- A** you can avoid queuing so much.
- B** you can enter the Park free for a year.
- C** you can visit certain zones closed to other people.

15 The Future Farm zone encourages visitors to

- A** buy animals as pets.
- B** learn about the care of animals.
- C** get close to the animals.

16 When is hot food available in the park?

- A 10.00 a.m. - 5.30 p.m.
- B 11.00 a.m. - 5.00 p.m.
- C 10.30 a.m. - 5.00 p.m.

Questions 17-20

What special conditions apply to the following rides?

Choose **FOUR** answers from the box and write the correct letter, **A-F**, next to the questions **17-20**.

	Special conditions for visitors
A	Must be over a certain age
B	Must use special safety equipment
C	Must avoid it if they have health problems
D	Must wear a particular type of clothing
E	Must be over a certain height
F	Must be accompanied by an adult if under

Rides

- 17 River Adventure
- 18 Jungle Jim Rollercoaster
- 19 Swoop Slide
- 20 Zip Go-carts

Questions 21-22

Choose **TWO** letters, **A-E**.

What **TWO** things do Brad and Helen agree to say about listening in groups?

- A** Listening skills are often overlooked in business training.
- B** Learning to listen well is a skill that's easy for most people to learn.
- C** It's sometimes acceptable to argue against speakers.
- D** Body language is very important when listening.
- E** Listeners should avoid interrupting speakers.

Questions 23-24

Choose **TWO** letters, **A-E**.

What **TWO** things does the article say about goal-setting?

- A** Meetings should start with a clear statement of goals.
- B** It's important for each individual's goals to be explained.
- C** Everybody in the group should have the same goals.
- D** Goals should be a mix of the realistic and the ideal.
- E** Goals must always to be achievable within a set time.

Questions 25-26

Choose **TWO** letters, **A-E**.

What **TWO** things do Brad and Helen agree are weak points in the article's section on conflict resolution?

- A** It doesn't explore the topic in enough detail.
- B** It only discusses conservative views.

- C** It says nothing about the potential value of conflict.
- D** It talks too much about 'winners and losers'.
- E** It doesn't provide definitions of key terms.

Questions 27-30

What actions do Brad and Helen agree to do regarding the following preparation tasks?

Choose **FOUR** answers from the box and write the correct letter, **A-F**, next to the number.

Preparation tasks

- 27 Preparing the powerpoint
- 28 Using direct quotations
- 29 Creating a handout
- 30 Drawing up a bibliography

	Action
A	Contact the tutor for clarification.
B	Check the assignment specifications.
C	Leave it until the last task.
D	Ask a course-mate to help.
E	Find information on the Internet.
F	Look through course handbooks.

Questions 31-40

Access <https://ieltonlinetests.com> for more practices

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

Engineering for sustainable development

The Greenhouse Project (Himalayan mountain region)

Problem

Short growing season because of high altitude and low 31 _____

Fresh vegetables imported by lorry or by 32 _____, so
are expensive

Need to use sunlight to prevent local plants from 33 _____

Previous programmes to provide greenhouses were 34 _____

New greenhouse

Meets criteria for sustainability

Simple and 35 _____ to build

Made mainly from local materials (mud or stone for the walls,
wood and 36 _____ for the roof)

Building and maintenance done by local craftsmen

Runs solely on 37 _____ energy

Only families who have a suitable 38 _____ can own one

Design

Long side faces south

Strong polythene cover

Inner 39 _____ are painted black or white

Social benefits

Owners' status is improved

Rural 40 _____ have greater opportunities

More children are educated

Solution:

- 1 terminal
- 2 Pantera
- 3 east
- 4 07765 328411
- 5 hotel (restaurant)
- 6 raincoat
- 7 (walking) shoes
- 8 Mountain Lives
- 9 chocolate
- 10 a calendar
- 11 C
- 12 B
- 13 A
- 14 A
- 15 C
- 16 B
- 17 F
- 18 B
- 19 D
- 20 E
- $\frac{21}{22}$ A,D
- $\frac{23}{24}$ B,E
- $\frac{25}{26}$ B,C
- 27 C
- 28 B
- 29 D
- 30 F
- 31 rainfall
- 32 air
- 33 freezing
- 34 unsuccessful
- 35 cheap
- 36 grass
- 37 solar
- 38 site
- 39 walls
- 40 women

Audio Script:

SECTION 1

You will hear a woman, called Tanya, talking to her friend, called Simon, who lives abroad. Tanya is planning to visit Simon.

Hello.

Hi, is that Tanya?

Yes ... Simon ... lovely to hear you! How are you?

Very well ... and we're so looking forward to seeing you.

So am I.

Now I don't have a lot of time, I'm afraid, so I wanted to make sure we've got all your details. Have you confirmed your flights?

Yes I'm definitely coming on the twenty second of June.

Excellent. Have you got your **Example** flight number?

Not with me, I'm afraid, but I promise I'll email it ... let me make a note of all this.

Yes, do, because one of us'll try to come and collect you from the airport, if we can. I presume you'll be coming into **Q1 Terminal** One?

Aggh ... I don't know ... I'll have to find out which one it is ...

Yes ... you must ... we don't want to be waiting at the wrong one!

But hang on ... I'll be arriving at about lunch time ... and that'll mean you have to take time off work to pick me up. You really mustn't do that.

Look ... we're not all that busy at work and if there's a problem I can text you when you arrive and you can take a taxi.

OK .

There's a really good company called **Q2 Pantera**.

Can you spell that?

It's P-A-N-T-E-R-A. They have a stand at the airport ... you can't miss it ... and they're really reliable.

Great, thanks ... how far are you from the airport?

About forty minutes.

[Access https://ieltonlinetests.com](https://ieltonlinetests.com) for more practices

And you're near the city centre, aren't you?

We're **Q3 East** of it actually ... don't tell the driver city centre because you'll really get caught up in traffic!

Tanya: OK! And I'll make sure I carry your address with me. Now have you got my mobile ... um ... cell phone number?

Simon: Yes, you sent it last month.

Tanya: But I tell you what ... I don't think I've got yours ... I'd better have it now, just in case.

Simon: OK ... and I changed it recently anyway. Ready? It's **Q4 zero seven seven six five, three two eight, four double one.**

Thanks. Now, what should I pack ... ?

Well, all the usual ... casual clothes mainly. Though you'd better bring an evening dress. We'll be having at least one fancy dinner at a **Q5 hotel** restaurant.

Now, when you're coming, unfortunately the weather's not going to be brilliant.

I know, it's the rainy season ... I'm bringing an umbrella.

We have tons of those ... so don't pack one, but pack a **Q6 raincoat** . a good one 'cause we'll try and get out for plenty of hikes.

OK, sure. Sounds super ... just what I love. And I'd better remember to pack my sturdy walking **Q7 shoes**.

Excellent idea ... it's pretty rugged round here ... so they have to be tough!

I can imagine. I'm so looking forward to getting out. Oh Simon, before I forget, you recommended I read a book about your area .

Yeah.

What was the name again? I'd like to read it ... to get an idea of the history, etc.

It's called '**Q8 Mountain Lives**' and it's ...

Hang on ... I'm just writing it down ... OK.

... and it's by Rex Campbell.

Great, I'll try and get hold of that.

Well worth it.

Now the really important things are gifts.

Oh don't worry about that . just bring yourself .

I know but I'd like to get something for your parents. What about Janice ... I know she loves English tea.

That's very kind ... but she's not drinking so much of that these days. But she'd love some **Q9 chocolate** ... you know her favourite.

Oh yes ... that'd be nice ... I'll do that. And Alec? Is he still into racing?

Very much so.

I was thinking of bringing a **Q10 calendar** ... you know, with horse-racing pictures.

What a good idea ... he'd love that ...

Great . so that's about it I think.

Yes, I think so . so you'll send me your number .

SECTION 2

You will hear a podcast on Camber's Theme Park.

Presenter: Welcome to Camber's Park podcast. In the next few minutes, I'll tell you a little about the park and the amazing things we have to offer.

We like to think that Camber's offers more than other theme parks. Like them, we have a variety of exciting rides for people of all ages, but **Q11 Camber's also places strong emphasis on the educational experience** for its visitors ... not boring facts but lots of interactive exhibits. Although it's mainly an outdoor experience, we do have some indoor activities if the weather gets too dreadful.

The park's got a lovely well established feel, set in eighty acres of beautiful countryside about three miles south of the tourist resort of Dulchester. The park was set up in **Q12 nineteen ninety seven** by the Camber family but then taken over by new owners in two thousand and four, who have maintained the original vision of the Cambers. It has lots of old trees, hundreds of flower beds and a gorgeous lake.

Camber's has over forty- five different rides, exhibits and arcades. **Q13 All but one of these is free once you have paid your entrance fee (we charge a small fee for our newest ride, to reduce the length of the queues).** You don't pay **anything for parking**. A family ticket - for a family of four - works out at about eight pounds per person, which is amazing value. Full details of current prices are shown on our website, along with full details of rides, etc., and directions

for getting to us.

We also have a number of special offers. For example, if you live locally, why not join our Adventurers' Club, which entitles you fifty percent off ticket prices all year round, and a special 'lane' for all rides and exhibits which means

Q14 you don't have to wait to get into any part of the park. See the Offers tab on the website.

We've recently added a number of new exhibits to the park, and we're particularly proud of our Future Farm Zone, which houses over twenty different species of animals, from chipmunks to dairy cows. **Q15** The emphasis is on getting near to the animals - all of them can be petted and you can buy food for feeding the animals. Many of our younger visitors say that this is the high point of their visit!

And speaking of food, don't let the animals have all the fun. We have a total of seven different catering outlets on the site. We're open ten to five thirty all year round and cold drinks and snacks can be bought at any time during opening hours. And hot food is available most of the day in the Hungry Horse cafe - **Q16** from eleven until five - just half an hour before closing time.

Presenter: Now we want all our visitors to have an exciting time when they come to the park but our first priority must be safety. Parents and guardians know their children's behaviour and capabilities. But here at the park we have set certain conditions for each of the rides to ensure that all visitors get the maximum enjoyment out of the experience and feel secure at all times. There are four major rides at the park. Our newest ride is the River Adventure which is designed to reproduce the experience of white-water rafting. No amount of protective clothing would make any difference so only go on this ride if you're prepared to get wet! Children under eight can go on this ride, but **Q17** all under sixteens must have an adult with them.

Not all of our rides are designed for thrills and spills. Our Jungle Jim rollercoaster is a gentler version of the classic loop the loop, specially created for whole family enjoyment - from the smallest children to elderly grandparents, suitable for all levels of disability and health conditions.

Carriages have comfortable seating for up to eight people, with **Q18** safety belts for each passenger which must be worn at all times. Sit back and enjoy the scenery!

One of the best established and most popular of Camber's rides is the massive Swoop Slide. Whizz down the polished vertical slide nine metres in height and scream to your heart's content. There are no age or height restrictions. Be careful though - **Q19** you must have on long trousers so you won't get any

speed burns!

And then there's the famous Zip Go-kart stadium with sixteen carts: eight for single drivers and eight for kids preferring to ride along with mum, dad or carer. Take part in high-speed races in our specially designed Formula One-style karts - but no bumping other karts, please. **Q20** All riders must be above one point two metres because they have to be able to reach the pedals ... even in the shared karts.

Full details of all safety features are available on our website at www.Camberspark.com.

So come and make a day of it at Camber's Theme Park!

SECTION 3

You will hear two business studies students discussing a presentation they'll do on an article on working effectively in groups.

So, Brad, what did you think of the article on group work?

Oh hi, Helen ... yeah it was pretty good ... with helpful pieces of advice on how to make group work effective.

I think we were lucky to be given such a straightforward text to present at the management skills seminar.

Yeah ... actually shall we discuss it now ... have you got time?

Sure ... it's only a ten-minute presentation, so we just need to explain and then give our views on the main points raised in the article.

I'll jot down some notes ... Right.

So, there are three main sections. I suggest we start with listening.

Yeah ... effective listening in groups ... **Q21** because it's not something that's frequently covered on courses in our field ...

No ... and we should say that in the presentation.

Yeah ... And also effective listening's pretty simple, you know, I don't think it's hard to learn. Well ... people think it's easy, but in my experience most of us tend to be very lazy listeners. OK - I wouldn't argue with that.

Something I do think we should **Q22** emphasise is the power of the listener's posture, gestures, etc. in making speakers feel respected.

... not that you're just waiting for them to finish before jumping in with your

own ideas ...

Ah ha.

Right ... the next section is on goal setting - let's make sure we're clear what the article says on this.

Yeah - well, firstly it says that **Q23** all group members must be given time to explain their own goals.

... that's it, yeah.

... and then did it say that the whole group should agree on common goals?

That's a bit too strong. It's more that everyone's agendas should be equally acceptable ... but it does say that goals have to be realistic, you know

Q24 achievable within a particular time?

You've got it. That's really what the article's saying. There isn't really any point in having 'ideals' if group members know they won't come to anything within a reasonable period ...

So ... I think a summary covering those points will be enough for that part of the presentation, don't you?

Yep ... Now the last section is about conflict resolution.

Actually, I thought it was the worst part of the article.

Me too .

I don't think it went into sufficient detail on the issue.

Actually I thought it devoted too much space to it but that it was all rather boring, you know.

Q25 It didn't mention some of the more radical theories ... absolutely .I found that really irritating.

Right ... and also I think **Q26** it could have said more about conflict sometimes being healthy in groups ...

Absolutely ... it just mentioned rather glibly about how we should avoid thinking of winners and losers and that quick resolution of conflict is always desirable.

Brad: Without explaining what these terms mean ... ?

Helen: Well, it gives quite detailed definitions but doesn't develop a proper argument.

Brad: Right ... So for the presentation, I think we just give some

definitions and ...

Helen: ... and then explain what we felt were the weaknesses in the article's treatment of conflict

resolution.

Brad: Yeah ... good.

Brad: So, let's think about what we have to prepare for the actual presentation.

Helen: Well, I suppose we'll use **PowerPoint** ... but I'm hopeless at using it, especially if it has any visuals. I really have to look into doing a course on it because I know I'll need it in the future.

Brad: Don't worry, I'm quite happy using **PowerPoint** and I'll put it together **Q27** when everything else is **Q27** ready.

Helen: That's a relief ... but, yes, do that later.

Brad: OK. Now, I heard the tutor saying we have to include some well chosen quotations from the article?

Helen: I'm not sure if we do ... I'll email him to find out.

Brad: No need, **Q28** I can just have a look at the specs he gave us when he set the task ...

Helen: That'll be quicker.

Brad: But the tutor definitely said we have to prepare a handout to go with the talk ... I'm not really sure how we do that.

Helen: Sarah did one last year ...

Brad: Who's she?

Helen: She's doing the same option as me on marketing. **Q29** I'll ask her advice on what to include.

Brad: Great. So that just leaves the bibliography at the end. I suppose it'll mainly be articles.

Helen: Yeah. So we'll just look on the web ... and we can leave that till later.

Brad: But we've been advised against that ...

Helen: Well, we could have a look through some journals in the library.

Brad: **Q30** I think we should start by looking through module

handbooks. I think that'll give us some good leads.

Helen: Yeah ... you're probably right. So, that's all the ...

SECTION 4

You will hear a lecturer talking to a group of engineering students about the design of a greenhouse.

Lecturer: Good afternoon. This is the first of a series of lectures I'll be giving about engineering for sustainable development. I'll be presenting examples of engineering projects from a variety of contexts, and today I'm going to talk about a project to design a new kind of greenhouse for use in the Himalayan mountain regions.

First of all, I'll tell you about the problem which was the context for this project. In the Himalayan mountains, fresh vegetables and other crops can only be grown outside for about ninety days, during the summer, because the altitude of the region is around three thousand five hundred metres, and because the **Q31 rainfall** is so low. In winter, temperatures fall below minus twenty-five degrees celcius, so fresh vegetables have to be imported. They arrive by truck in summer or by **Q32 air** in winter, which makes them expensive. Local people rely on dried leafy vegetables and stored root crops during the winter, and rarely eat fresh vegetables.

But despite the sub-zero temperatures, the skies over the region are cloudless, and there are over three hundred sunny days per year. So an engineering solution was needed, to exploit the sun's energy and protect locally produced plants from **Q33 freezing** during winter. And in fact, there had been programmes in the past to provide greenhouses, but these were **Q34 unsuccessful**. The greenhouses weren't adapted for local conditions, so they tended to fall into disuse.

So, a few years ago, a project was initiated to design a better greenhouse, one which would meet the criteria for sustainability.

Lecturer: So, what are the criteria for sustainability? Well, first of all, the new greenhouse is designed to be relatively simple, so construction is **Q35 cheap**. Locally available materials are used wherever possible. The walls are generally constructed of mud bricks, made locally, although in areas of high snow-fall more resilient walls of stone are needed. Rammed earth is also used. The main roof is generally made from locally available poplar wood, with water-resistant local **Q36 grass** for the covering. In addition, the construction and maintenance of the greenhouse is done by local craftsmen. So local stone

masons are employed to build the greenhouse walls, and specialised training is provided for them wherever necessary.

Then... the greenhouse is designed to run on **Q37 solar** power alone, there's no supplementary heating. And lastly, families are selected to own one of the new greenhouses with great care. They have to have a **Q38 site** which is suitable for constructing it on. They also have to be keen to make a success of using it, and also to share the produce with the wider community through sale or barter. Potential owners are taken to see existing greenhouses before they make a final decision about having one.

So, those are the features which make the project sustainable. And now I'll briefly describe the design of the greenhouse. The greenhouses are orientated very carefully along an East- West axis, so that there's a long South-facing side. The transparent cover on the Southfacing side is made from a heavy-duty polythene, which should last for at least five years.

On the inside of the greenhouse, the **Q39 walls** are painted - the rear and west-facing walls are black, to improve heat absorption, but the east-facing wall is white to reflect the morning sunlight onto the crops inside. Finally, there's a door in the wall at one end, and vents are incorporated into the roof, the door and the wall at the other end, to enable control of humidity and prevent overheating.

I'll turn now to the benefits which have resulted from the introduction of these new greenhouses. These benefits are of various kinds, but for now I'll just mention the social benefits.

First of all, people who own a greenhouse gain social standing in their communities, because they provide vegetables for the wider community, for regular consumption as well as for festivals, and they also earn income. Secondly, because in rural areas it is **Q40 women** who usually grow the food, the greenhouses have increased their opportunities. They bring the benefits of improved nutrition, and increased family income, from the sale of surplus produce. And thirdly, as a result of their improved financial position, some families can now afford to educate their children for the first time.
