WRITING TASK 1

You should spend about **20** minutes on this task.

The table below shows the percentage of adults in urban and rural areas who took part in four free time activities in 1990 and 2010. Summarize the information and compare where relevant, by selecting and reporting the key features.

You should write at least **150** words.

	1990		2010	
	Urban	Rural	Urban	Rural
Reading	61	71	78	78
Animated play	10	18	10	14
Playing	21	26	14	26
Photography	7	14	17	24

WRITING TASK 2

You should spend about **40** minutes on this task.

Reporting of crimes and other kinds of violent news on television and in newspapers can have adverse consequences. This kind of information should be restricted from being shown in the media. To what extent do you agree or disagree with this statement?

You should write at least **250** words.

SAMPLE WRITING TASK 1

The bar chart shows the number of British people who emigrated to five destinations over the period 2004 to 2007. It is evident from the chart that throughout the period, the most popular place to move to was Australia.

Emigration to Australia stood at just over 40,000 people in 2004, which was approximately 6,000 higher than for Spain, and twice as high as the other three countries. Apart from a jump to around 52,000 in 2006, it remained around this level throughout the period.

The next most popular country for Britons to move to was Spain, though its popularity declined over the time frame to finish at below 30,000 in 2007. Despite this, the figure was still higher than for the remaining three countries. Approximately 20,000 people emigrated to New Zealand each year, while the USA fluctuated between 20-25,000 people over the period.

Although the number of visitors to France spiked to nearly 35,000 in 2005, it was the country that was the least popular to emigrate to at the end of the period, at just under 20,000 people.

(Words 179)

SAMPLE WRITING TASK 2

Studying a language in a country where it is widely spoken has many advantages. It is, therefore, a good idea to study English in a country such as Britain. However, I believe it is not the only way to learn the language.

In the first place, most students in non-English-speaking countries learn English at secondary school, and sometimes at university nowadays. Although their spoken English is not usually of a very high standard, their knowledge of grammar is often quite advanced. This is certainly useful when students come to an English-speaking country to perfect the language.

Secondly, studying the basics of English at secondary school is less stressful than learning the language while overseas. This is because students living at home do not have to worry about problems such as finding accommodation, paying for their study and living costs, and trying to survive in a foreign country where day to day living causes much stress.

However, there are obvious advantages of learning English in Britain. Every day there are opportunities to practise listening to and speaking with British people. Also, students can experience the culture firsthand, which is a great help when trying to understand the language. This is especially true if they choose to live with a British family, as exchange students for example. Furthermore, if students attend a language school full-time, the teachers will be native speakers. In this case, not only will students' speaking and listening skills improve, but attention can be given to developing reading and writing skills as well.

In general, even though it is preferable to study English in an English-speaking country, a reasonable level of English can be achieved in one's own country, if a student is gifted and dedicated to study.
