

# IELTS Mock Test 2022 January Writing Practice Test 1

## HOW TO USE

You have 2 ways to access the test

1. Open this URL <https://link.intergreat.com/UTySI> on your computer
2. Use your mobile device to scan the QR code attached

# WRITING TASK 1

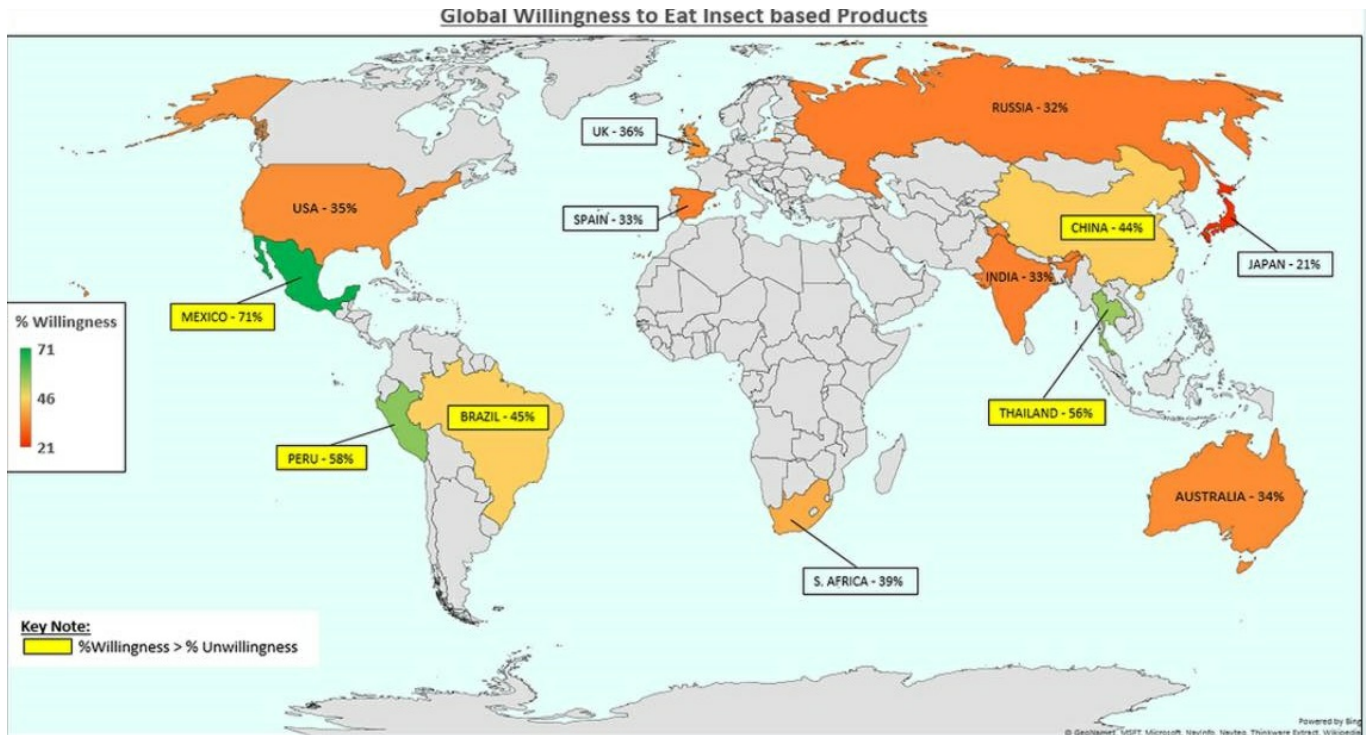

You should spend about **20** minutes on this task.

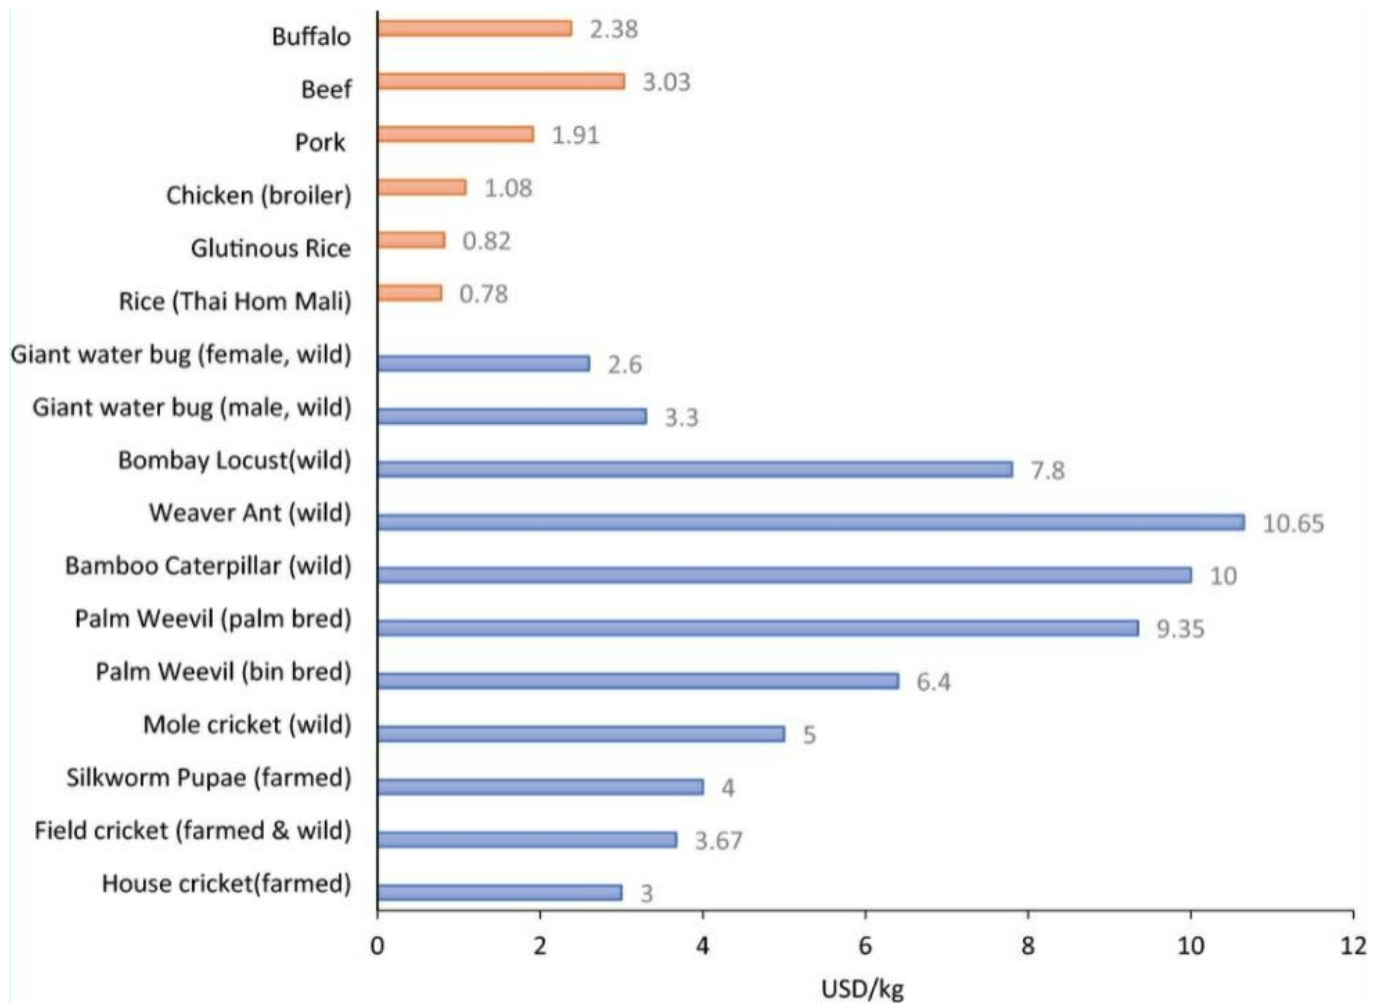

The map and chart below show the information for the global willingness to eat insect products and the current price for certain food available on the market place.

Write a report for a university, lecturer describing the information shown below.

Summarise the information by selecting and reporting the main features and make comparisons where relevant.

You should write at least **150** words.

## WRITING TASK 2

You should spend about **40** minutes on this task.

Write about the following topic.

To meet the growing need for food to support an increasing population, a country should make use of edible insects as a food source. However, some people believe that insects are not only unhealthy but harvesting them will also negatively affect nature. What are the benefits and drawbacks of eating insects?

*Give reasons for your answer and include any relevant examples from your own knowledge or experience.*

You should write at least **250** words.

# SAMPLE WRITING TASK 1

The line graph illustrates the average cost that American customers spent on mobile and landline phone services annually over a 10-year period.

Overall, spending on residential phone services dramatically declined, while popularity of mobile services increased sharply throughout a decade. Also, both of services met at the same record in 2006.

In 2001, spending on mobile phone services began by merely \$200, while the amount of annual expenditure on the residential phone services was around \$700. Over the following five years, expenditure on landline phone services gradually dropped below \$600, whereas expenditure on cell phone services rose to just over \$500.

In 2006 cell phones overtook landline phones, and the services became equal in popularity with customers' annual expenditure of about \$550. Then, cell phone expenses rose to approximately \$750 in 2010, making nearly a fourfold jump relatively to its initial figure in 2001. Meanwhile, spending on residential phone services experienced a steep fall in 2007 and went on to steadily decrease for the rest of the period.

# SAMPLE WRITING TASK 2

An essential element of the ecosystem is water. Water pollution occurs when harmful chemicals or microorganisms are released into water bodies, which results in the degradation of animal and human's life quality.

The most common cause of water pollution is the direct disposal of industrial and human waste into the surface water. Another reason worth mentioning is the oil spill. Since the dawn of industrialization, numerous factories have been discharging toxic chemical compounds such as metallic sulfides or cyanides. When being introduced into lakes, rivers, and seas, these toxic wastes poison freshwater or saltwater animals and plants, subsequently destroy the ecosystem. Even when the industrial waste is buried in the ground, they can still permeate the soil to pollute the underground water, thus begin the process again.

Another cause of water pollution is human waste. Various kinds of pathogenic bacteria live in human feces, and they may cause gastrointestinal infection if they appear in the water supply. Oil spills are also the reason for sea pollution. Most of the marine animals cannot digest oil, or cleanse the spilling oil on their feathers. Therefore, they will die soon unless there are human interventions. The spill also adversely affect seawater, which damages the tourist industry of coastal regions.

To summarize, water pollution is mostly the result of oil spills and industrial or human waste

disposal. It severely affects the environment and subsequently the life of animals and human.
