

# IELTS Recent Mock Tests Volume 3

## Writing Practice Test 5

### HOW TO USE

You have 2 ways to access the test

1. Open this URL <https://link.intergreat.com/Ggt3T> on your computer
2. Use your mobile device to scan the QR code attached

# WRITING TASK 1

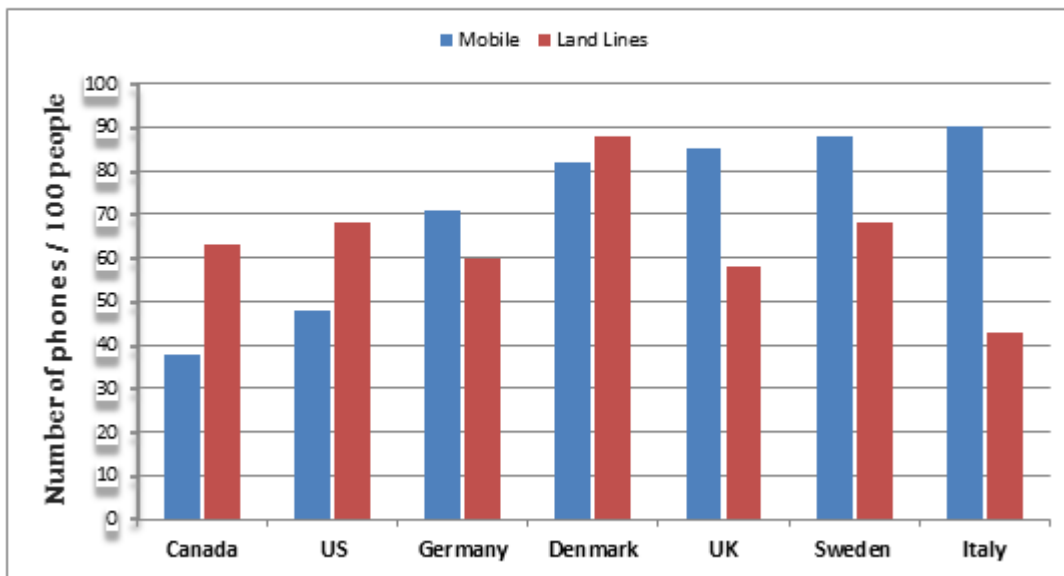

You should spend about **20** minutes on this task.

The chart shows the number of mobile phones and landlines per 100 people in selected countries.

Write a report for a university lecturer describing the information given.

You should write at least **150** words.

**Mobile Phones and Land Lines per 100 people**

# WRITING TASK 2

You should spend about **40** minutes on this task.

A country becomes more interesting and develops more quickly when its population includes a mixture of nationalities.

To what extent do you agree or disagree?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

You should write at least **250** words.

# SAMPLE WRITING TASK 1

The graph shows the number of mobile phones and landlines per 100 users, for selected countries. Overall, most of the countries included in the graph have more mobile phones subscribers than landlines.

Most European countries have high mobile phone use. The biggest users of mobile phones are the Italians, with 88 cell phones per 100 people. For example, Italy has twice as many mobile phones as landlines, with 88 mobiles per hundred people compared to 45 for landlines. Mobile phone use is low in Canada, with fewer than 40 phones per 100 people. Denmark is also unusual because it has slightly more landlines than mobile phones.

However, in some countries, the number of landlines is higher than the number of mobile phones. One example is the USA, where the number of mobiles, at 50 per 100 people, is much lower than the number of landlines, at almost 70 per hundred. A similar pattern can be seen in Canada. The highest number of landlines in the graph is in Denmark, with about 90 per 100 people. In contrast, the lowest figures for fixed lines are in Italy and the UK.

In conclusion, it seems that mobile phone use is higher in Europe than in North America.

# SAMPLE WRITING TASK 2

Interesting due to things like different cultural aspects like types of cuisine Develops quickly due to a diverse workforce

Some people argue that a nation where there are people from various countries and cultures benefits from these characteristics as it becomes more fascinating and grows at a faster pace. I totally agree with this opinion and I will elaborate on the reasons below.

The main reason why I believe that the mixture of individuals from other nationalities represents an advantage for a country is because a culturally and ethnically diverse country is more interesting as there are many different lifestyles reflecting different ethnic origins in it. More specifically, in a multi-cultural society, one can enjoy a variety of unique traditions and customs which is very exciting and adds spice to life. For instance, I live in a highly diverse area and the options when eating out are outstanding as there are so many styles of cuisine to choose from.

Moreover, I believe that progress in multicultural nations is much quicker due to the diversity of the workforce. The reason for this is that different nationalities have different strengths which can be harnessed in the workplace. For instance, Europeans have high levels of creativity and artistic flair, while Asians have outstanding skills in math and science. Therefore, companies can draw on these respective strengths of the population, and as a consequence, the economy

of the country will prosper.

In summary, I totally agree that a combination of immigrants from different nationalities and with different traditions provide advantages for a nation. This is due to the more interesting society it creates, along with the diversity in it which the workforce allows. Therefore, it seems that countries should embrace higher levels of cultural diversity.
